Goal: remote Senior Product / Frontend Engineer (React, TypeScript) on a product team.

About

Senior Product Engineer (frontend-leaning), 7 years: React, TypeScript, Next.js. I ship complex product UIs to production: RBAC, long forms, OpenAPI/Orval, GraphQL/REST, WebSocket, CI/CD.

End-to-end ownership: API contracts, modules, review, deploy, production. Enterprise (X5, BI.ZONE, NLMK, Citilink) and product work (Mini Apps, seat maps, streamer tools).

Looking for a role that needs strong FE with product ownership — not pixel-pushing.
