Goal: remote Senior Frontend Engineer (React, TypeScript, Next.js) on a product team.

About

Senior Frontend Engineer, 7 years. Stack: React, TypeScript, JavaScript, Next.js, REST API, CI/CD.

I build complex product UIs and ship them to production: roles and access, long forms, GraphQL, WebSocket, CI/CD, production debugging.

Enterprise: X5, BI.ZONE, NLMK, Citilink. In a product studio - sole frontend on Mini App, dashboard, and a Canvas hall-layout editor. Looking for a remote Senior Frontend role with ownership of a module from API to release.

PREEGLOS - Ticket storefront and hall layout editor

- Built the storefront and checkout on Next.js: Auth.js, PostgreSQL, REST API from OpenAPI
