Goal: remote Senior Product / Frontend Engineer (React, TypeScript) on a product team.

About

Senior Product / Frontend Engineer, 7 years. React, TypeScript, Next.js. I ship complex product UIs to production: roles and access, long forms, REST and GraphQL, WebSocket, CI/CD.

I take work from backend contract through deploy and production support. Enterprise (X5, BI.ZONE, NLMK, Citilink) and product studio work (Mini Apps, hall layouts, streamer tools).

Looking for a remote role that needs strong frontend with module ownership, not layout-only work.
